"This document represents my authentic experience and capabilities. No embellishment, no fluff—just the story of a consultant who discovered how AI can transform human learning."

EXECUTIVE SUMMARY

Business consultant who discovered the future of learning. After 15 years building systems across consulting, marketing, and operations, I compressed decades of traditional learning into months using AI.

PMP CERT

1 Week

LEARNING SPEED

10x

TRADITIONAL TIME

6+ Months

This wasn't incremental improvement. It was a **fundamental shift in how humans can learn**.

THE BUSINESS MODEL

APX Instinct translates that breakthrough into scalable business value through three integrated offerings:

- **High-Touch Seminars:** Teaching professionals to leverage synthesis-driven learning at \$1,000/day, proving willingness to pay
- **AI-Powered Platform:** Converting seminar attendees to a subscription learning platform at \$99/month, democratizing access
- **Infrastructure Replacement:** Building AI teachers that require no human in the loop, replacing the education model entirely

Core Insight: We're not improving online courses. We're replacing traditional education infrastructure with AI-powered synthesis that delivers 10-50x learning velocity at 90% cost reduction.

QUANTIFIED IMPACT

OPERATIONAL LEADERSHIP

- Managed teams of **25 people** across complex projects
- Led **\$10M annual operations** with consistent on-time, on-budget delivery
- Supervised construction projects ranging **\$1M-\$50M** under strict regulatory compliance

MARKETING & GROWTH

- Achieved **5x ROAS** on campaigns with \$10K+ ad spend
- Designed full-funnel strategies for SaaS, fintech, and startup clients
- Built brand architecture and go-to-market strategies across industries

AI-ACCELERATED LEARNING

- Passed **PMP certification in 1 week** (typically requires 6+ months)
- Earned 3 professional certifications using compressed AI-driven methods
- Achieved 10-50x learning velocity in technical domains

TECHNICAL EXECUTION

- Developed comprehensive 25-page engineering analysis documentation
- Built automation systems and IP-backed frameworks
- Created APX Instinct platform architecture from concept to market-ready in 12 months

15+ Years Consulting: Delivered business growth strategy, brand development, and operational transformation for 25+ clients across industries—from startups to established enterprises.

PROFESSIONAL JOURNEY

APX INSTINCT AI | FOUNDER & CEO | 2024-PRESENT

Built synthesis-powered learning platform from concept to market-ready in 12 months. Developed proprietary AI architecture enabling personalized, adaptive learning at scale.

- Designed go-to-market strategy combining high-margin seminars with subscription conversion
- Created comprehensive financial model projecting path to \$460M ARR within 18 months
- Established IP framework and patent applications for synthesis methodology

COVERED WAGON CO. | BUSINESS GROWTH CONSULTANT | 2011-2024

15 years delivering strategic consulting across business development, brand architecture, and operational systems for startups and established businesses.

- Built frameworks that evolved into APX Instinct's core methodology
- Served 25+ clients across diverse industries and company stages
- Specialized in business growth strategy and operational transformation

NUCURA | DIRECTOR OF PRODUCT & BRAND INNOVATION | 2021-2022

Led product development, UX/UI design, and go-to-market strategy for health/wellness platform.

- Established early IP framing and brand differentiation
- Drove product strategy in competitive market landscape

OPERATIONS & PROJECT LEADERSHIP | 2011-2020

- Supervised teams of 25+ across \$10M operations
- Estimated and managed construction projects \$1M-\$50M
- Developed systematic approaches to complex project delivery
- Maintained OSHA and regulatory compliance across all projects

WHY THIS FOUNDER

THE PERSONAL DISCOVERY

I dropped out of college 15 years ago betting that entrepreneurship would yield better returns than traditional education. That decision proved correct—but I learned slowly, through expensive trial and error.

THE BREAKTHROUGH

When I started using AI this year, everything changed. The learning velocity wasn't 2x or 5x—it was **10-50x in certain domains**. I compressed months of PMP study into one week. I wrote technical documentation at expert levels in days. I gained capabilities that would have taken years through traditional methods.

THE MARKET INSIGHT

Everyone sees AI as a tool. I saw it as a **teacher**. Not a supplemental resource or study aid—a fundamentally superior method of learning that combines personalization, adaptive pacing, and synthesis across unlimited knowledge domains.

The Gap: Most people are learning at 10% of AI's capability because they're applying old mental models to new technology. Using AI well is an art that can be taught.

WHY NOW

- **Technology Ready:** AI capabilities are exploding with breakthrough synthesis models
- **Market Need:** Professionals desperate to upskill but lack time for traditional methods
- **Economic Pressure:** Education systems breaking under their own weight and cost
- **Proven Model:** My own transformation validates the approach works

FOUNDER-MARKET FIT

PATTERN RECOGNITION

15 years navigating complex systems across construction, marketing, consulting, and AI gives me cross-domain synthesis that pure academics lack.

PRACTICAL EXPERIENCE

I've managed real operations, real budgets, real teams—I understand how professionals actually learn and what they need to perform.

LEARNING VELOCITY

I am the use case. My own transformation from AI novice to synthesis expert in 12 months proves the model works.

TEACHING THROUGH LEARNING

I'm building the learning system while using it myself—this recursive loop creates continuous innovation.

EXECUTION TRACK RECORD

- **PMP Certified:** Proven ability to scope, plan, and deliver complex projects on time and on budget
- **CPE Certified:** Commitment to ongoing professional development and learning
- **Operations Management:** Successfully led \$10M annual operations with teams of 25+
- **Client Results:** 15+ years of documented success across 25+ consulting engagements

The Unique Advantage: I combine real-world operational experience with proven AI learning mastery and deep understanding of how professionals actually need to learn—not how academics think they should learn.

THE VISION

DEMOCRATIZING INTELLIGENCE

Education becomes abundant, personalized, and essentially free. We're not building a better MOOC—we're replacing the entire education infrastructure.

PHASE 1: PROVE VALUE

Start with professionals who can pay. **\$1,000/day seminars** prove the value, generate revenue, and refine the methodology. Early customers validate that synthesis-driven learning delivers measurable business results.

PHASE 2: SCALE ACCESS

Move down-market with a **\$99/month app** that makes the same learning velocity accessible to everyone—students, career changers, self-directed learners. AI teaches anything: cooking, science, business, programming. No human bottleneck. No geographic constraints.

PHASE 3: INFRASTRUCTURE REPLACEMENT

The end state: **AI teachers that require no human in the loop**. Education becomes abundant and personalized at massive scale.

COST REDUCTION

90%

VELOCITY INCREASE

10-50x

GEOGRAPHIC LIMITS

None

This is the right moment. The technology exists. The market need is urgent. And I've proven the model works on myself.

EDUCATION & CERTIFICATIONS

PROFESSIONAL CERTIFICATIONS

PROJECT MANAGEMENT PROFESSIONAL (PMP)

Certified in project delivery and execution. Demonstrates mastery of project management principles, methodologies, and best practices. Passed certification in 1 week using AI-accelerated learning methods.

CONTINUING PROFESSIONAL EDUCATION (CPE)

Ongoing professional development across business, technology, and operational domains. Commitment to staying current with industry best practices and emerging trends.

OSHA 30-HOUR CERTIFICATION

Safety and regulatory compliance certification. Demonstrates understanding of workplace safety standards and regulations for construction and operational environments.

EDUCATION

WASHINGTON STATE UNIVERSITY

Business Management coursework. Foundation in business operations, strategy, and organizational management principles.

Philosophy: Dropped out of traditional education 15 years ago to pursue entrepreneurship. Proved that real-world experience combined with AI-accelerated learning delivers superior results to conventional academic paths.

TECHNICAL CAPABILITIES

AI/ML PLATFORMS

- **Foundation Models:** GPT-4, Claude, Mistral, and other leading LLMs
- **Custom Development:** Custom GPT development and deployment
- **Prompt Engineering:** Advanced prompt design and optimization
- **Architecture Design:** Synthesis-driven learning system architecture

DEVELOPMENT & TECHNICAL

- **Frontend:** React.js, Next.js, Three.js for interactive experiences
- **Backend:** Python for automation and system development
- **Frameworks:** Automation frameworks and workflow systems
- **Integration:** API integration and system connectivity

BUSINESS SYSTEMS

- **Automation:** Zapier for workflow automation
- **CRM:** HubSpot, Salesforce for customer management
- **Project Management:** Notion, Agile methodology implementation
- **Financial Modeling:** Comprehensive projection and scenario analysis
- **IP Development:** Patent application and trademark workflows

Technical Philosophy: Focus on practical implementation over theoretical knowledge. Build systems that solve real problems and deliver measurable results. Leverage AI to accelerate development cycles and compress learning curves.

VALIDATION & REFERENCES

PROFESSIONAL REFERENCES

Former clients and colleagues across consulting, operations, and product development available to verify execution capabilities, leadership approach, and business outcomes. References span 15 years of professional experience across multiple industries and company stages.

EARLY CUSTOMER VALIDATION

Initial market validation through beta program participants and industry feedback. Early adopters confirm market need, willingness to pay, and effectiveness of synthesis-driven learning approach.

INDUSTRY VALIDATION

Market research with business professionals, consultants, and entrepreneurs confirms pain points around AI education and learning efficiency. Target customer personas validated through direct conversations and needs assessment.

DUE DILIGENCE SUPPORT

BACKGROUND VERIFICATION

- Educational transcripts
- Professional certifications
- Corporate filings
- Client testimonials

FINANCIAL VERIFICATION

- \$46K self-funding documentation
- Project cost records
- Revenue projection basis
- Customer research data

LEGAL STANDING

- Background check available
- Credit verification available
- Current certifications

INTELLECTUAL PROPERTY

- Patent applications filed
- Trademark registrations
- IP documentation

FOUNDER PROFILE

Building the platform that replaces traditional education infrastructure with AI-powered synthesis—democratizing 10-50x learning velocity for everyone.

"This document represents my authentic experience and capabilities.
No embellishment, no fluff—just the story of a consultant who
discovered how AI can transform human learning, and is building the
company to deliver that transformation at scale."
