Ben Miller

AI Integration, Innovation Strategy, Patent & IP Development, High-ROI Automation
San Francisco, California, United States

Summary

I partner with visionary executives, ambitious startups, and innovation-driven organizations to strategically integrate AI, accelerate R&D, and deliver extraordinary business value. With over 15 years of experience in strategy, product innovation, and high-impact consulting, I specialize in translating advanced AI and automation technologies into immediate profitability and long-term competitive advantage.

As the founder of APXCore, I lead a cross-disciplinary innovation lab focused on deep-tech execution, IP-backed invention, and scalable systems design. Clients gain access to executive-level strategy, premium tools, and proprietary frameworks including:

Executive AI Integration Framework™ – Immediate business growth via intelligent systems

Rapid Prototype & Patent Blueprint™ – Idea-to-IP in weeks, not years

AI-Driven ROI Scaling Formula™ – Operational automation that drives measurable profit boosts

What I Do

✓ AI-Driven Business Innovation – Develop custom AI strategies aligned with product vision and execution. Implement high-ROI solutions across core functions to unlock fast, measurable results.

✓ Patent Strategy & Invention Acceleration – Deliver rapid prototyping and IP development systems that take concepts from idea to investor-ready patent within weeks.

✓ Enterprise Automation & Efficiency Systems – Design modular automation solutions and integrations (Zapier, HubSpot, Salesforce, Notion) that eliminate inefficiency and scale intelligently.

- ✓ Executive AI Strategy Workshops – Run premium executive sessions to align stakeholders on AI integration, strategic tech planning, and innovation roadmapping.
- ✓ Investor-Ready Innovation Roadmaps – Create fundable, IP-aligned product strategies tailored for pitch decks, go-to-market execution, and long-term valuation.

Tools & Platforms

GPT-4, Claude 3, Grok, Mistral, Custom GPTs
Zapier, HubSpot, Salesforce, Notion, Make, ClickUp
USPTO workflows, agile prototyping, pitch system design
Slack, Zoom, Google Suite

Ideal Collaborators

- Tech founders building scalable, defensible IP
- Startups looking to turn product into patents (and patents into funding)
- Executives pursuing automation, AI, and innovation systems
- VCs & innovation teams needing high-impact strategy + execution

Let's Connect

If you're ready to take an idea from concept to prototype, automate intelligently, or scale with IP in mind—send me a message. Let's build what's next.

Experience

APX Instinct AI

Founder & Executive AI Strategist

April 2022 - Present (3 years 5 months)

San Francisco, California, United States

APX Instinct is an elite innovation consultancy specializing in AI-powered R&D acceleration, intelligent automation systems, and full-stack patent strategy. I founded APX Instinct to help founders, inventors, and deep-tech teams convert complex ideas into investor-ready, scalable IP-backed solutions.

Core Capabilities:

- # AI-powered R&D systems using GPT-4, Claude, Mistral, and custom LLMs
- # Rapid prototyping and product development (from concept to MVP in weeks)
- # Patent strategy including ideation, drafting, and monetization
- # Automation frameworks reducing operational cost and friction by 30–50%
- # Strategic roadmaps aligning product, IP, and market execution

Key Projects:

Engineered the Quantum Pair Scanner Mark II—took from idea to patent-pending prototype in 7 days

Developed AI systems for an executive coaching platform projected to double ROI and client acquisition

Built investor-ready innovation roadmaps used to secure funding for deep-tech and SaaS startups

Clients & Focus Areas:

APXCore supports executives, founders, and VC-backed teams building the next wave of deep-tech innovation. Focus areas include AI, clean energy, quantum systems, and scalable SaaS/IP hybrid models.

Tools & Frameworks Used:

LLMs (GPT-4, Claude 3, Mistral), Zapier, HubSpot, Salesforce, Notion, USPTO provisional workflows, Agile prototyping, pitch development systems

APXCore exists to bring invention to market with velocity, structure, and strategic clarity—merging execution with originality.

Covered Wagon Co

Business Growth & Innovation Consultant

June 2011 - April 2024 (12 years 11 months)

San Francisco Bay Area

As the founding strategist at Covered Wagon Co, I led a range of client engagements focused on business growth architecture, brand systems, and early operational transformation. This role laid the foundation for the methodologies I would later scale under APXCore.

Core Focus Areas:

Designed full-stack growth strategy systems for startups and SMBs

Delivered brand development frameworks aligned with business model clarity

Advised on early automation and workflow optimization

Merged creative strategy with business infrastructure to increase scale-readiness

Supported founders with positioning, pricing models, and go-to-market alignment

Strategic Evolution:

- ✓ Developed early versions of IP-backed strategy tools now refined at APXCore
- ✓ Worked across industries (tech, construction, wellness, local services) to build adaptable frameworks
- ✓ This role became the incubator for executive-level systems thinking and multi-modal strategy execution

NuCura

Director of Product & Brand Innovation

May 2021 - June 2022 (1 year 2 months)

Washington, United States

At NuCura, I led the development of creative IP, UX systems, and go-to-market strategy for a next-generation health and wellness platform. This was a pivotal role where I began merging brand systems, product innovation, and early-stage IP strategy into a cohesive innovation delivery model.

Key Responsibilities & Achievements:

Directed end-to-end product development, from concept to MVP

Built UX and UI frameworks aligned with market positioning and user behavior

Developed original brand identity, naming systems, and content architecture

Led early IP framing around proprietary experience design & product mechanisms

Collaborated cross-functionally with designers, engineers, and founders

Designed GTM strategy with performance-focused messaging, CX design, and positioning

Strategic Impact:

- ✓ Established a foundation for IP-backed product thinking, now core to APXCore's innovation process
- ✓ Helped NuCura define a differentiated brand experience in a crowded market
- ✓ Pioneered a hybrid role that fused creative systems and commercialization pathways

Brenton Way

Growth Strategist – Tech & SaaS Focus

August 2021 - November 2021 (4 months)

Los Angeles, California, United States

At Brenton Way, I worked as a strategic growth consultant inside a fast-moving agency serving SaaS platforms, AI tools, and emerging tech startups. My focus was on designing high-conversion funnels, product positioning frameworks, and early automation systems that aligned with client go-to-market strategies.

Key Contributions:

Designed data-backed growth funnels for funded B2B SaaS and AI clients

Created positioning systems and messaging strategy for pre-series A startups

Integrated early-stage AI-powered tools (chatbots, predictive content, segmentation)

Supported cross-functional launches between product, marketing, and strategy

Worked with both product-led and sales-led growth models

Strategic Impact:

✓ Helped clients establish early traction and investor-ready messaging

✓ Gained hands-on insight into how AI interfaces with customer journey design

✓ Strengthened my foundation in scaling digital systems—now applied at APXCore in AI-led innovation, automation, and product development
